

# Human-oriented Technology in Data-Intensive Startups

Sep 28 7-9PM World Room in Columbia's Pulitzer Hall

Our kick-off event features short talks and a panel with three experts at cutting-edge data intensive startups that are enhancing human expertise in the areas of creative work, analytics, and marketing.

Events are open to the public. Great refreshments will be served.

## (Data+Media): Humans in the Loop Speaker Series

New York City is the most creative city in the world. Increasingly, human creativity is enhanced by data-intensive algorithms and technologies. "Humans-in-the-loop" has the potential to massively accelerate the speed and scale that content is created, delivered, and consumed.

**(Data+Media): Humans in the Loop** is a speaker series on how technology enhances how humans create, consume, and understand creative, artistic, and civic expression across all forms of media. Organized by the Center for New Media.
